- At DIB, we offer bilateral and syndicated financing in addition to trade and working capital facilities, cash management and treasury solutions

DIB Trade Club

www.dibtrade.ae

Membership of the DIB Trade Club offers customers access to two distinct online platforms – Trade Club and Trade Portal.

The Trade Club is a front-end interface, which provides cross-border B2B matchmaking enabling DIB customers and the clients of the Trade Club Alliance partner banks to identify mutually beneficial business opportunities. In addition, it establishes an online marketplace for pre-vetted Requests for Offers (RFOs) posted by the clients of the partner banks.

The Trade Portal, on the other hand, complements the former, with an online knowledge base providing customers with trade and other relevant data from several hundred trusted sources. The portal, which aims to improve trade efficiency, has 5 modules or tools including country profile, market information, counterpart information, trade compliance and custom calculators. DIB can extend the portals to its existing or potential customers whilst building strategic FI relationships with a network of global banks.
